1. Applicant is reminded of the proper language for an abstract of the disclosure.

The abstract should be in narrative form. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Correction is required.

2. Claims 12-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 12, 14 and 15 are indefinite in that they fail to point out what are included or excluded by the claim language. These claims are omnibus type claims.

Claims 12, 14 and 15 are also improper because they do not further limit 1, 10, and 2.

Claims 13 and 16 depend from indefinite antecedent claims.

3. Claims 1-11, 17-23 are allowed.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dao L. Phan whose telephone number is (571)272-6976. The examiner can normally be reached on M-F 9:00-5:30.
